# **SITUATION SUMMARY**

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought
- NOAA/NWS has issued an updated El Nino outlook. The salient points below were received from NWS Western Region this morning.
  - An El Nino event is currently on-going and is strengthening
  - The NWS remains highly confident that this El Nino event will continue through the winter
  - There are several models we use to forecast El Nino events. There is an ever-stronger consensus among these models that this El Nino event will evolve into a strong El Nino event as we move into and through the winter. However, a relative few number of these models are forecasting a weaker El Nino event this winter.
  - As we get closer to the winter, our skill in forecasting El Nino strength improves.
  - El Nino has little-to-no impact on summer temperatures and precipitation.
  - Interestingly, there is a positive correlation between El Nino events and increased tropical cyclone activity in the eastern Pacific.
  - The strongest correlations with enhanced precipitation occur across mainly southern CA during the winter associated with strong El Nino's. There is little-to-no correlation between enhanced precipitation and weak or moderate strength El Nino's.
- It's too early to make any statement regarding the strength of the El Nino and what the winter precipitation will look like. As such, messages regarding conservation should remain in place.

## **Weather of Concern**

Heavy rain may cause flash flooding and debris flows for the mountains and Sierra Nevada in Northern California today. In addition, isolated severe thunderstorms are possible today with hail/wind impacts for mountains in Northern California.

## **Active Weather Warnings, Watches and Advisories by County:**

## Temperature

### 8-14 Day Temperature Outlook

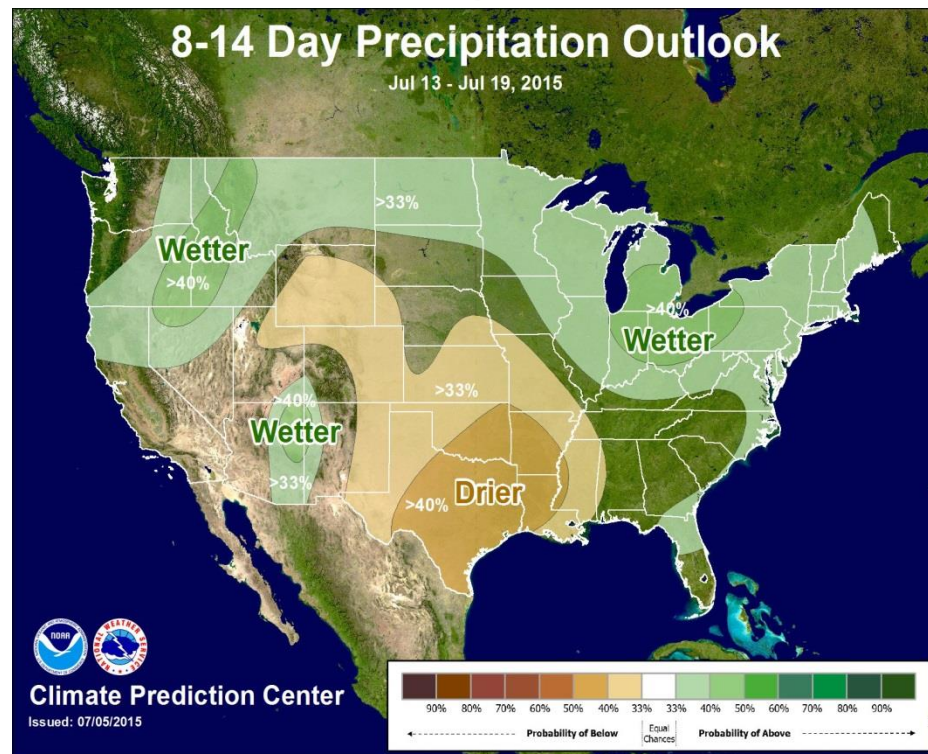

Jul 12 - Jul 18, 2015

## Precipitation

### 8-14 Day Precipitation Outlook

Jul 13 - Jul 19, 2015

Slight probability of above normal temperatures across the entire state and a slight probability of above normal precipitation across northern California.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Showers and thunderstorms will continue today due to a weakening disturbance sliding across central California. Activity will subside over the coming days as more typical weather returns to northwest California.

#### **Medford Weather:**

Today will be the last best day for thunderstorms in the forecast area, although chances will not go away completely for a few more days. A second trough will begin to dig in along the coast of the Pacific Northwest on Friday bringing a chance for showers and thunder in the afternoons through Sunday, but chances will be lower than previous days. Temperatures have begun their downward swing as the cooler air mass filters into the area.

#### **Reno Weather:**

Showers, isolated thunderstorms and mild temperatures are expected today for the Sierra and western Nevada as an upper low moves into California. Chances for showers and storms decrease Friday and Saturday as a drier air mass begins to work into the region. Early next week, showers will end with temperatures slowly warming back to near average.

#### **San Francisco Weather:**

An upper level area of low pressure moving across central California will maintain cooler than normal conditions across inland portions of the region through the end of the week and into the weekend. In addition, a slight chance of showers and thunderstorms will continue through the evening.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

Scattered mainly mountain showers or thunderstorms are forecast through Friday with heavy rain in the mountains. Isolated flash flooding is possible. Temperatures will be below normal with a strong Delta breeze. Dry conditions are forecast from Sunday through the middle of next week with a warming trend.

#### **Hanford Weather:**

A low pressure system will move across the area today and bring below average temperatures and showers and thunderstorms to the Sierra Nevada. The low will move east of the region on Friday and dry southwest flow will then prevail over the weekend and into the early parts of next week. Temperatures will warm Friday through the weekend and dry conditions will prevail throughout the area by Saturday.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

An area of low pressure aloft will move towards southwestern California today bringing cooler than normal conditions with mostly cloudy skies west of the mountains. There will be a slight chance of thunderstorms in some mountain locations this afternoon and evening. Low pressure will persist over the region into early next week. There will continue to be night through morning low clouds for the coast and some valleys with a warming trend expected by midweek as high pressure builds.

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

An unseasonably deep upper level trough of low pressure will move across central California today. This will bring occasional drizzle and light rain this morning for much of the coastal and valley locations through late morning, or even early afternoon near the coast. Winds will be strong especially this afternoon and evening along the mountain passes and desert slopes. Upper level high pressure will build over the area starting Friday, with a warming trend through early next week along with night and morning clouds and fog near the coast and portions of the valleys. Some mid and upper level moisture from monsoonal flow may bring a thunderstorm or two to the mountains Sunday afternoon and early evening.

#### **Southeast California Weather:**

Thunderstorm chances will be significantly lower than usual for the middle of the monsoon season. Despite the lack of storm activity, temperatures will remain near to slightly below normal. This weekend and early next week, high pressure will strengthen again leading to warmer temperatures. There may also be an increase in storm activity.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Regions (Inland, Coastal, Southern) will consolidate and have one collective OA drought call Monday's at 1100 hours beginning 07/06/15 facilitated by the SOC. Cal OES Director Mark Ghilarducci will hold a statewide OA drought call on 06/29/15 at 1000 hours.

### Department of Homeland Security Active Shooter Preparedness Workshop July 15, 2015

**\*\*THIS IS NOT A TACTICAL TRAINING COURSE\*\***

#### **Overview**

The Ventura County Sheriff's Department, Office of Emergency Services and the National Protection and Programs Directorate Office of Infrastructure Protection within the U.S. Department of Homeland Security are hosting a one-day Security Workshop to enhance awareness of, and response to, an active shooter event:

- Educating participants on the history of active shooter events;
- Describing common behavior, conditions, and situations associated with active shooters; and
- Fostering communication between critical infrastructure owners and operators and local emergency response teams. This course includes discussions of interoperability, communications protocols, and best practices for planning, preparedness, and response.

#### **Target Audience**

- Corporate and facility security professionals from the private and public sectors;
- Supervisory first responders; and
- Homeland security representatives.

#### **Venue: California State University Channel Islands (C.S.U.C.I.)**

1 University Drive  
Camarillo, CA 93012  
Del Norte Lecture Hall
